

PGY – 2 Infectious Diseases*

The Infectious Diseases Pharmacy Residency program offers unique experiences to develop the knowledge and clinical skills to practice in the area of infectious diseases and HIV. The resident will function as a member of the multidisciplinary infectious diseases team within the inpatient and outpatient setting. Our goal is to promote individual growth, professional development, self-reliance, and responsibility by developing an autonomous clinical practitioner. Clinical practice, drug information, teaching, and research are emphasized. The program will prepare the resident to serve as a clinical pharmacy specialist in a variety of specialty infectious disease settings including academia.
