

Pharmacy Residency - PGY2 Psychiatric Pharmacy Residency

The PGY-2 Psychiatric Pharmacy Residency program specializes in the inpatient care of patients with serious mental illness. The program is design to develop an autonomous clinic practitioner. Clinical practice, drug information, teaching and research are emphasized. The resident will function as a member of a multidisciplinary team. After completing the PGY-2 Psychiatric Pharmacy Residency program, the resident will be able to provide and establish clinical psychiatric pharmacy services as well as implement teaching programs in any patient care setting.
