Lymphoma Evaluation and Treatment

The Cancer Committee at the Louis Stokes Cleveland VA Medical Center (LSCVAMC) makes sure that patients treated at the medical center receive care according to national treatment guidelines. These guidelines suggest what the best practice is for cancer care. As a Commission on Cancer (CoC) accredited cancer program, the LSCVAMC looked at the cancer care for patients that were diagnosed with lymphoma in 2014. A cancer physician reviewed the information collected to determine if each patient received the care and treatment according to the national treatment guidelines.

Below is a summary of the report.

- Eleven cases reviewed
- Eleven cases were diagnosed and treated at the LSCVAMC
- Eleven cases (100%) received recommended treatment according to the national guidelines

The LSCVAMC Cancer Committee oversees all cancer related activities at the medical center.

If you should have any questions about cancer care at the LSCVAMC, contact Deborah Fox at (216) 791-3800 ext. 6545 or e-mail deborah.fox2@va.gov.
